

For immediate Release

International law firm Bird & Bird has recently revamped its know-how system, Solutions Lab. The system, developed with UC Logic, now allows lawyers to search across matter related documents that are saved to the document management system. Search results retrieved respect the security applied to the document management system and preserve the firm's risk management policies and procedures.

The system incorporates cutting edge search technology, conceptSearching, and provides integrated access to the latest internal and external repositories through one online interface. It also allows lawyers to easily locate, with accuracy, other lawyers within the firm with specific subject matter expertise or experience.

Bird & Bird is now working with UC Logic to incorporate their pitch documentation, league tables, directories and award information into Solutions Lab.

Notes for editors
